

FREE EVENT

Dementia Support Australia

Funded by the Australian Government
A service led by HammondCare

Supporting **complex dementia** for health professionals

Join Dementia Support Australia for a **FREE local dementia education event for healthcare professionals including aged care, acute care, disability care or any other health service.**

Hear directly from our team of expert dementia specialists, to unpack complexity in care, including: assessing and supporting changes to behaviour including when there are mental health comorbidities, understanding expressions of sexuality and reflecting on relationship-based approaches in dementia care, along with navigating referrals to Dementia Support Australia for on the ground support and helpline advice, that is aligned to best practice behaviour support planning.

You'll have an opportunity to ask questions of our expert panel. Stay for our networking event and talk with our teams and colleagues. We're here to help.

[**dementia.com.au/scde**](https://dementia.com.au/scde)

Event highlights:

- Enhance expertise in dementia care strategies.
- Access latest dementia support research.
- Optimise pharmacological and psychotropic care approaches.
- Build capacity within your team through sustainable solutions.
- Learn directly from dementia care experts.

Gain Continuing Professional Development (CPD) points:

Through attending, health and aged care professionals will receive a certificate of completion and be eligible for Continuing Professional Development (CPD) points.

These events are designed to support your ongoing learning and professional growth, with content aligned to best practice in dementia care. It's a valuable opportunity to deepen your expertise while connecting with peers and specialists in your field.
